Introducing our new FD691 Commercial Truck Tire

FD691

- Commercial drive tire for long and regional-haul applications
- Ideal for fleet owners
- High removal miles
- Highly-retreadable and long-lasting casings
FD691

- Low rolling resistance
- Lowest total cost of ownership
- Approved for use on EPA SmartWay™ certified vehicles
- Meets California Air Resources Board (CARB) requirements
FD691

Based on rolling resistance and field mileage tests:
- Our most fuel-efficient
- Lowest total cost of ownership tire solution when compared to other Firestone tires

It replaces:
- FD695 Plus
- FD690 Plus

FD691

Tie Bars:
- Control movement of center & second tread blocks
- Low rolling resistance
- Even wear

Continuous Shoulder:
- Reduced rolling resistance
- Controls movement of the ribs & blocks during rotation
FD691

Flow-through Design:
- Allows for water evacuation to enhance road grip

Deep 26/32nds Tread:
- More original tread life for high removal mileage

Firestone
FD691

NanoPro-Tech™ Polymer Technology:
• Limits energy loss for optimum fuel efficiency

High-rigidity Tread Pattern:
• Reduced rolling resistance
• Controls movement of ribs & blocks during rotation

Firestone

FD691

Proprietary Sidewall Technology:
• Compound designed to limit heat loss
• Help improve fuel efficiency, (when new & when retreaded)

Innovative Sidewall Design:
• Reduces overall tire weight
• Improve fuel efficiency without sacrificing durability

Firestone
FD691

Optimized Bead Design:
- Lowers rolling resistance
- Improves fuel economy

Extending your fleet’s tire life
And reducing your “Cost per Mile”
