

Out-of-Service Tire Analysis (OOSTA)

Out-of-Service Tire Analysis is held in the Bridgestone Education Center in LaVergne, TN. This is a two-day course intended for those who desire a working knowledge of out-of-service tire analysis. Participants will understand why tires are prematurely removed from service, as well as the corrective actions to prevent future such removals.

WHO SHOULD ATTEND

You should attend if you are in a position such as:

- Equipment manager, sales person or operator
- Maintenance manager or mechanic with tire responsibility
- Equipment rental manager or sales person
- Tire service manager or personnel
- Shift supervisor or dispatcher

TOPICS

During this course attendees will learn:

- A consistent methodology for analyzing tires that have been removed from service
- How to determine the reasons for tires being removed from service
- Corrective actions to eliminate the premature removal of tires from service

By the end of this course participants will be able to:

- Describe tire construction basics and how they relate to performance of the tire
- Inspect out-of-service tires using various tire analysis tools, procedures and processes
- Inspect the tire's crown, sidewall, bead and interior for specific conditions
- Demonstrate how to use Condition and Cause Codes

•Please send any questions regarding this course to contact@bridgestonecommerciallearning.com, or contact your local Bridgestone or Bandag representative.
